PRACTICAL 8

Aim: Apply defect management, test case management, and execution report generation using Bugzilla and TestLink workflows.

Used Tools: Bugzilla and TestLink

TC ID: TC01

Test Case: Create test case in TestLink

Expected Result: Test case should be created and saved successfully in TestLink.

Actual Result: Test case was created and saved successfully in TestLink.

Status: Pass

Execution Screenshot:

TC ID: TC02

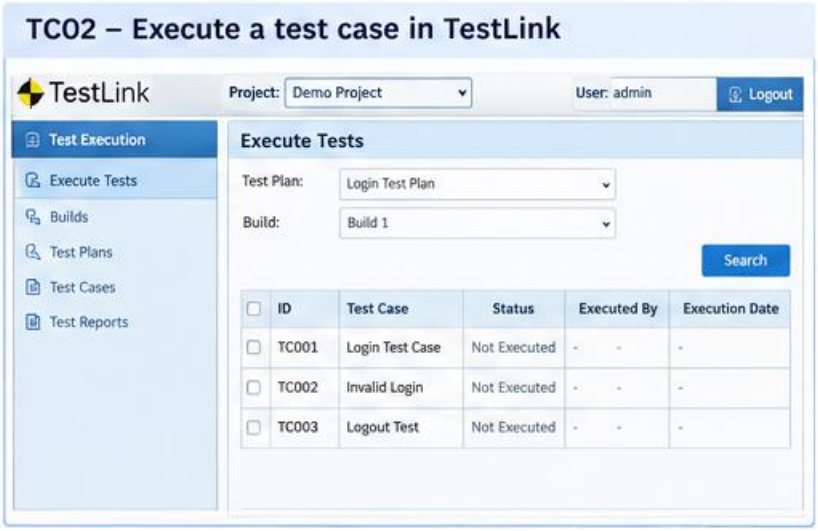

Test Case: Execute test case in TestLink

Expected Result: Test case execution should be recorded successfully.

Actual Result: Test case execution was recorded successfully in TestLink.

Status: Pass

Execution Screenshot:

TC ID: TC03

Test Case: Mark test case Pass

Expected Result: Test case should be recorded with PASS status.

Actual Result: Test case was successfully marked as PASS in TestLink**.**

Status: Pass

Execution Screenshot:

TC ID: TC04

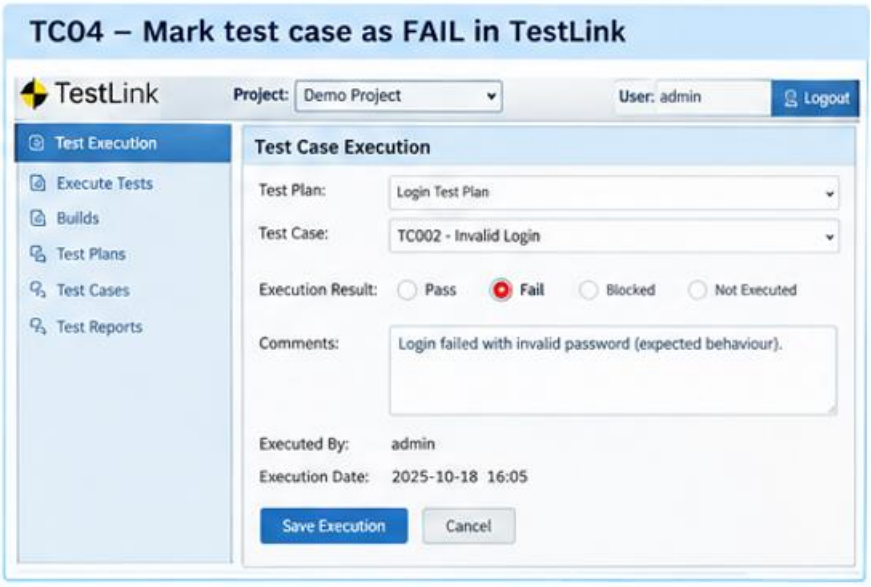

Test Case: Mark test case Fail

Expected Result: Test case should be recorded with FAIL status.

Actual Result: Test case was successfully marked as FAIL in TestLink.

Status: Pass

Execution Screenshot:

TC ID: TC05

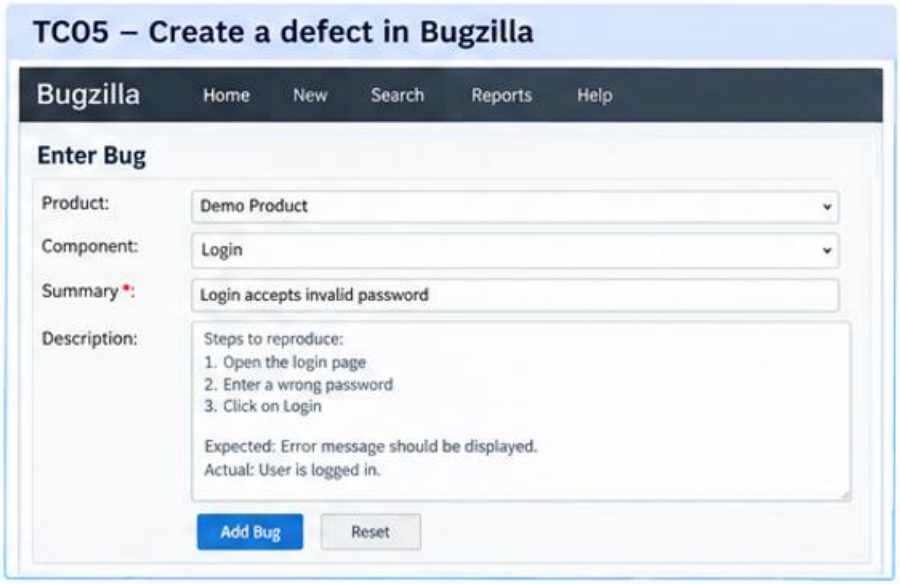

Test Case: Create defect in Bugzilla

Expected Result: Defect should be created successfully with a unique defect ID.

Actual Result: Defect was created successfully in Bugzilla with a unique defect ID.

Status: Pass

Execution Screenshot:

TC ID: TC06

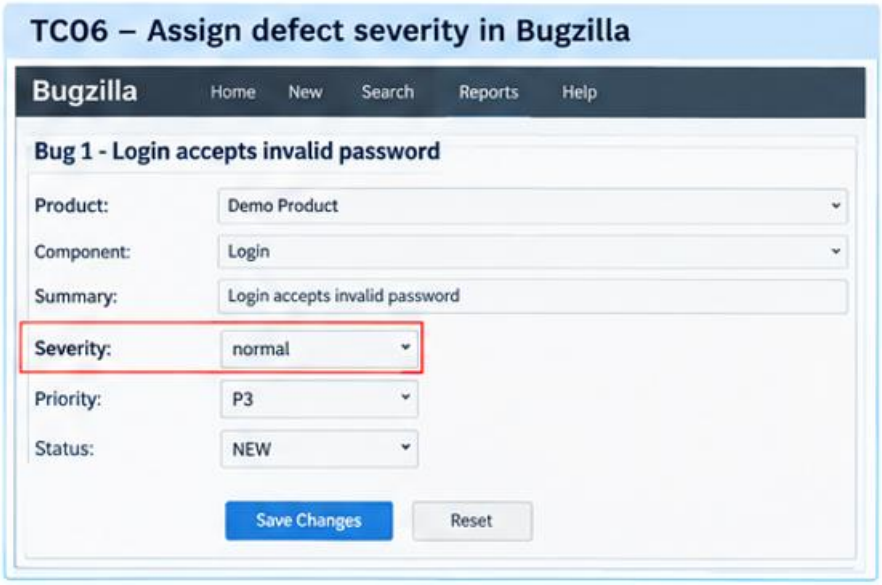

Test Case: Assign defect severity

Expected Result: Selected severity should be saved for the defect.

Actual Result: Defect severity was assigned and saved successfully.

Status: Pass

Execution Screenshot:

TC ID: TC07

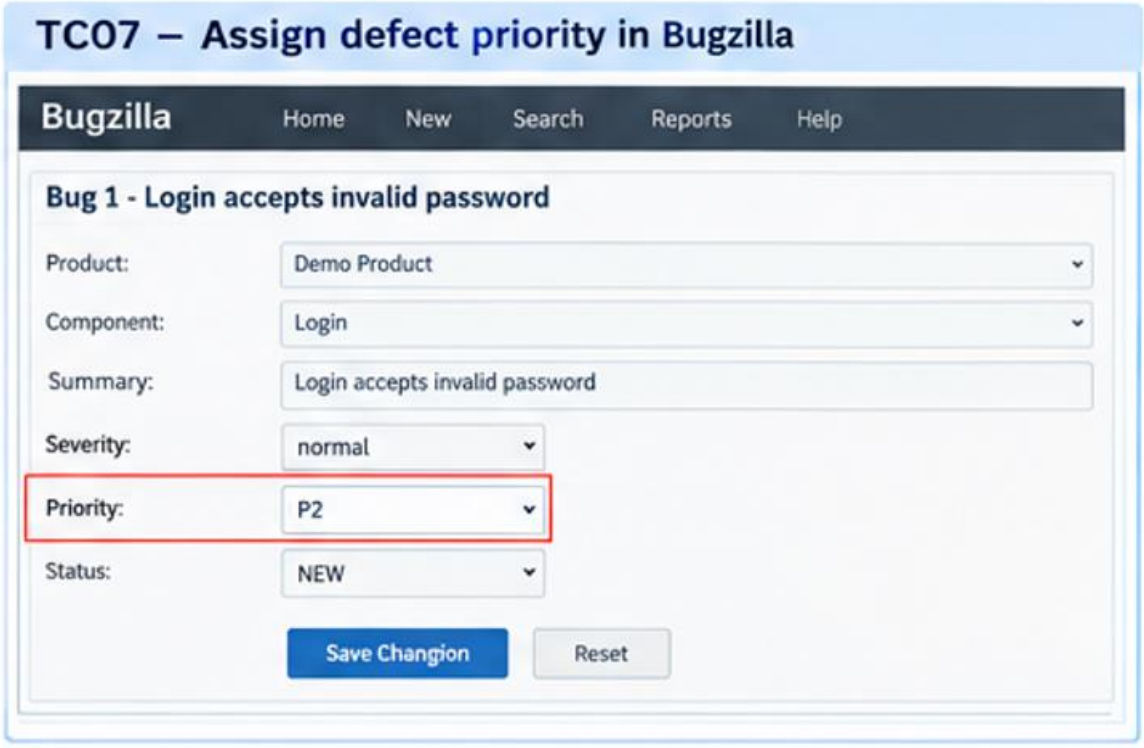

Test Case: Assign defect priority

Expected Result: Selected priority should be saved for the defect.

Actual Result: Defect priority was assigned and saved successfully.

Status: Pass

Execution Screenshot:

TC ID: TC08

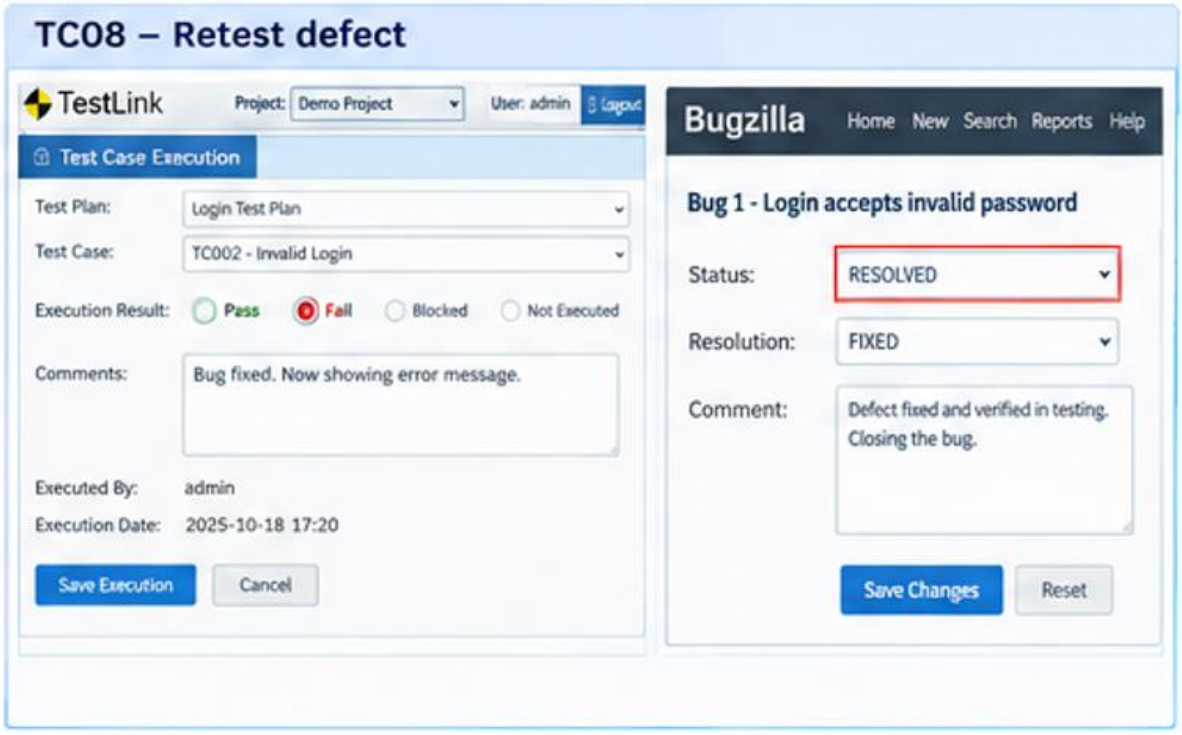

Test Case: Retest defect

Expected Result: Retest result should be recorded and the defect should be updated according to the actual result.

Actual Result: Defect was retested and the test result was recorded successfully.

Status: Pass

Execution Screenshot:

TC ID: TC09

Test Case: Generate execution report

Expected Result: Execution report should be generated and should reflect the recorded test results.

Actual Result: Test execution report was generated successfully in TestLink.

Status: Pass

Execution Screenshot:

TC09 – Generate execution report in TestLink
